**LINHOF 3D MICRO, A COMPLETELY NEW LINHOF LEVELLING HEAD
FOR ULTRA PRECISE POSITIONING**

The Linhof 3D Micro is a new levelling head developed by Linhof guaranteeing extremely precise camera adjustments.

The concept of the 3D Micro came from the proven integrated levelling system of the bench holder of the Linhof M 679. This levelling segment has been duplicated and turned through 90 degrees resulting in two precise segment guides for tilt and lateral levelling. Via rubber coated turning knobs self-aligning micro movements of 12 degrees are possible on both sides as well as front and rear.

An additional panoramic plate situated above the movement axis permits exact individual exposures for composed panoramic images. All adjustments can be controlled and repeated with precise scales.

The 3D MICRO is equipped with the Linhof Quickfix permitting a 'clic-clac' attachment of the camera. Two spirit levels serve for the control of the vertical positioning of the camera to assist in crucial architectural alignment.

The 3D MICRO is designed and planned for the use of precision cameras, especially the Linhof Techno, Master Technika and the Linhof Technorama systems. Needless to say that the 3D MICRO is also recommended for any precision camera with a load capacity of up to 10 kg requiring an accurate micro adjustment. An angled device permitting the use of the camera in a 90 degree position via the Quickfix plate is available as an optional accessory.

Technical Data

Linhof 3D MICRO: Measurements including operating elements 105 x 105 x 80 mm. Weight 850 g.

Weight Quickfix adapter plate 64 g.

Angled device for 3D MICRO: Measurements 105 x 55 x 70 mm. Weight 300 g.

INCREASED SYSTEM ACCESSORIES**NEW RAPID CHANGE ADAPTER SLIDE FOR LINHOF TECHNO AND LINHOF M 679**

With practical experience and needs of the photographer in mind the Linhof M 679 Rapid Change Adapter Slide has been modified and now offers the following features.

The overall length has been reduced from 40 to 30 cms which facilitates the portability for digital outdoor photography. An improved safety lock system for attaching digital backs. All currently available digital backs can be adapted by means of special camera adapter plates. Locks on the slide permit stitching and can be adapted in the factory to the individual chip formats of the digital backs.

TECHNO COMPENDIUM

The new adjustable compendium is attached via the accessory shoe of the Techno. Whenever needed the compendium can be adjusted to specific lens and light conditions. Optional accessories include a vignetting holder and filter holder.

BELLOWS MAGNIFIER FOR M 679 AND TECHNO

The new flexible 3x bellows magnifier for the Techno and M 679 allows groundglass control of the image up to the corners even in bright light. The magnifier is large enough for complete control of the groundglass image.

CAMERA CASE FOR LINHOF TECHNO

Designed for rugged field activities we are now offering an outdoor case specially suited for the Linhof Techno. It has sufficient space for the camera, lenses, wide angle bellows and Rapid Change Adapter Slide with digital back. The case includes a valve for pressure compensation, a cover and serves as a dust-proof transport container. A carrying belt is included. A carrying support is available as an optional accessory.

IMPROVED LINHOF QUICKFIX TRIPOD ADAPTER

Spirit levels have been added to the proven all metal design of the Quickfix tripod adapters. These aids assist controlled adjustments of all cameras from 35mm to large format cameras.
